

CRESCENT GUARDIAN, INC.
SECURITY & TECHNOLOGY SIMPLIFIED.

ABOUT CRESCENT GUARDIAN

Since 1993, Crescent Guardian has safeguarded thousands of public and private sector clients, giving them the confidence that their assets will be protected with unmatched reliability. Whether it's government, commercial, energy, manufacturing or any other critical industry, we deliver innovative, customized security for true peace of mind. Our comprehensive approach combines the latest technology with state-of-the-art security for protection against the usual suspects and the unthinkable.

FUSING ADVANCED TECHNOLOGY WITH TRADITIONAL SECURITY SERVICES

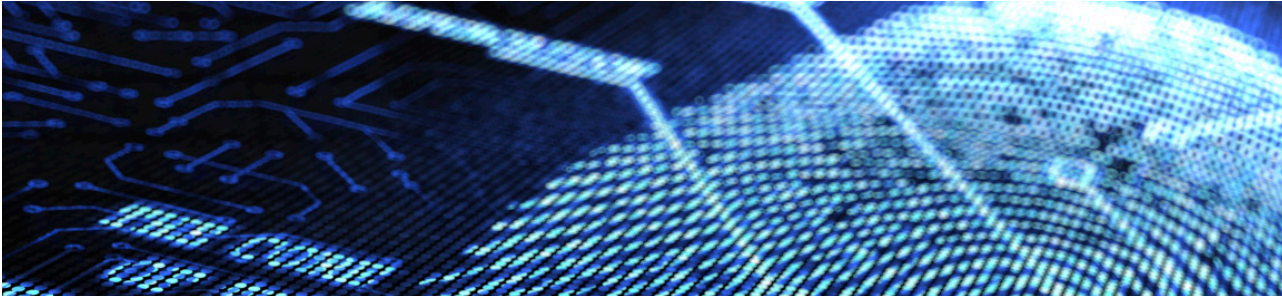

One of the keys to our success is our thorough knowledge of physical security combined with security technology, which enables our personnel to truly understand the needs of our clients. We anticipate trends and utilize best practices to deliver world class solutions that increase your security footprint and can reduce your overall costs. Our services are proven to reduce criminal activity, service disruptions and other risk factors that could impede business continuity. Our security guard force, combined with our countless business partners, has the experience, financial wherewithal and scale to solve the most complex security problems.

Our services and technology portfolio result in overall cost reduction, greater profitability and higher levels of satisfaction for our clients. Our security guards are trained on the latest security technology and know how to best integrate that technology for our clients. Our commitment to clients and community is a reflection of the deep rooted values, work ethic and high standards we were founded upon. Headquartered in New Orleans, Crescent Guardian has offices near Atlanta, Boston and Dallas, offering our unique security solutions across the United States.

OUR MISSION

Crescent Guardian's mission is to provide world class integrated security solutions centered around our core guard services. We create unmatched safety and security coverage with greater cost efficiency and increased presence to deter and detect potential threats to your environment.

TOTAL SECURITY PACKAGE

“ADVANCED TECHNOLOGY DESIGNED TO SIMPLIFY SECURITY”

Through the integration of advanced security technology, such as IP video surveillance and electronic track and trace, with professionally trained guard services, our services allows us to offer clients comprehensive asset protection that goes far beyond the traditional. This combination improves security practices, reduces overall costs and enhances efficiency to track, monitor and protect personnel, corporate information and assets. Our total security package is based upon Integrated Safety and Security Management (ISSM) as defined by the U.S. Department of Energy.

OUR CLIENTS

We provide customized, professional security services to a wide array of public and private sector clients. Our advanced solutions provide true peace of mind around the clock, giving our clients the ability to concentrate on their work, not their protection.

THESE INDUSTRIES INCLUDE, BUT ARE NOT LIMITED TO:

- Government – Federal, State, Local
- Commercial Enterprises
- Public Utilities (Critical Infrastructure)
- Entertainment
- Construction Companies
- Conventions and Conferences

APPLICATIONS

- Armed and Unarmed Guards
- IP Video Installation, Integration and Training
- Remote Monitoring
- Video Analytics
- Event Security
- Public Transportation Security and Mobility
- Automated Emergency Evacuation Process
- High Value Asset Monitoring
- Manufacturing Security and Safety

ARMED AND UNARMED SECURITY OFFICERS

Based on your security needs, Crescent Guardian is qualified to supply both armed and unarmed guards to ensure the protection of your environment, people and assets. Whether you need a guard merely as a visual deterrent or an armed officer for maximum security, you can be assured that your needs will be met with the most qualified and experienced guards available.

ARMED GUARDS

Our armed guards are firearm experts—trained and certified in the use of various handguns. Every armed guard is trained and qualified by firearms instructors who have years of experience. This ensures that each armed guard has the necessary knowledge and expertise to carry and use a weapon. In addition to our standard guard training programs, each armed guard receives extensive and recurrent training.

UNARMED SECURITY GUARDS

Unarmed security guards provide the added safety and confidence of general security to any business or public place, and we understand that a highly trained unarmed guard is sufficient to meet many security needs. In many cases, unarmed guards may be just as effective as those who are armed. The mere presence of an unarmed guard often provides peace of mind to customers and employees alike.

WEAPONS TRAINING INCLUDES:

- Firearm Safety
- Weapon Disassembling
- Sight Alignment
- Shooting Techniques
- Holstering Techniques
- Weapon Laws
- Ammunition Types
- How to Hold and Shoot a Weapon

SECURITY TRAINING INCLUDES:

- Safety
 - CPR and First Aid
 - Report Writing
 - Observation Techniques
 - State Laws in Private Security
 - Weapon Safety
 - Restraining Techniques
 - Security Radio Codes
- Handcuffing
 - Baton
 - Mobile Patrol
 - Video Surveillance

VEHICLE PATROL

One of the most effective security measures is a vehicle patrol, a deterrent that is constantly on the move. They can either act as additions to existing guard services or function as a stand-alone program of observation and deterrence.

Our Vehicle Patrol Services will ensure the security of your facility by patrolling the premises at random times so as to not be predictable in any way. A patrol security guard will drive to your location in a marked patrol vehicle and survey the grounds. The officer will be on the property for as long as it takes to perform their assigned rounds, check whatever checkpoints have been highlighted and then leave your property to return later for their next patrol rounds. The security patrol guard will write a report with the time and his activities for your records.

In case of an emergency or something unusual, the patrol officer will make sure that the situation is resolved before leaving the property. If necessary the patrol services officer will contact the client and the police.

Think a vehicle patrol would be best for you? We'll work to create a patrol schedule that will both accomplish your security goals and stay within your budget.

VIDEO SURVEILLANCE & ANALYTICS WITH EMERGENCY RESPONSE

Crescent Guardian's advanced Video Monitoring Solution exclusively offers IP digital surveillance equipment with remote monitoring software capabilities for instant access. This allows customers the ability to view real-time surveillance on their handheld devices, such as a PDA, and the usage of video analytics for automated analysis. Alternatively, we also provide 24 hour off-site video monitoring by our highly trained security staff to deliver protection during off hours at a lower cost.

The state-of-the-art video (behavioral) analytics software add-on can also provide unprecedented surveillance monitoring, 24/7/365. Think of it as having an all-knowing, all-seeing security guard who doesn't blink, is never distracted, doesn't need breaks and never misses potential threats.

BENEFITS

- Increases overall surveillance
- Reduces costs for monitoring
- Live video surveillance feed enables fast response time
- Reduces risks in disaster situations
- Provides emergency response
- Eliminates false alarm charges

Our highly trained professionals are available around the clock, ready to quickly analyze any situation and determine whether there is a need for a police presence. Having our security guards on call for your business will help keep you and your staff safe and calm during any situation.

VEHICLE PERMISSION SWITCH

BENEFITS

- Adheres to Federal Compliancy Requirements
- Enforces OSHA policies
- Reduces insurance premiums
- Reduces risk for litigation from unauthorized use
- Automated Authorized Operation
- Identifies person, time, route
- Prevents potential stolen vehicles
- Prevents unauthorized use
- Anti-theft capability
- Shut down engine capabilities
 - Low oil
 - High temp
 - License requirements

Crescent Guardian's Vehicle Permission Switch (VPS) is a keyless ignition switch for secure access to public transportation vehicles such as buses, trains, streetcars, shuttles and taxis.

The VPS features a card reader that works with many different types of identification cards to automatically enable the vehicle start-up only by an authorized operator. Alternatively, we offer a touchscreen keypad for individual key codes in the event an authorized driver's card is inoperable.

An optional LCD display provides an operator's daily checklist that can shut down the vehicle for critical items, and schedule maintenance by date or hour meter readings. This option is often required by OSHA as part of the Department of Transportation's initiative for public safety. In addition, there are option modules for sensing speed, impact, seat switch, auxiliary input, seat belt usage and low oil/high temperature. Wireless options such as Wi-Fi, Zigbee and Bluetooth are available for advanced programming such as text messaging, emailing and event notifications.

PHYSICAL SECURITY CONSULTANTS

Security consultation is important in obtaining peace of mind for both employees and management. Physical security is the first line of defense against the risk of any loss. A thorough survey will look at more than just lighting, landscaping and locks. Crescent Guardian can provide you with recommendations that will provide reasonable, cost effective and appropriate control measures that are commensurate with the risks to which your organization is exposed.

After careful analysis and assessment, our security consultants will be able to aid you in your decision as to whether or not your security measures are effective. We begin with an in-depth understanding of your company's risks and qualified threats compared against your critical assets and operational workflow requirements. Losses can result from theft, vandalism, sabotage and liability for the creation of unsafe premises.

Our experts perform threat and vulnerability assessments and develop policies around the outcome of those assessments to efficiently mitigate threat. Through this study, you will be able to see what works and what does not—Then we provide you with solutions for the most effective security.
